

PegasusEMR Billing Manager

Billing manager utilizes state of the art concepts and procedures to reduce data entry requirements for billers by 70-80%.

This reduction allows billers to focus on payer issues, verification and collections.

Billing Manager :

- Unique procedures reduce data entry by an estimated 70-80%.
- Chemotherapy billing calculation are completed by the system allowing a typical 8 hour billing cycle to be completed in 2 -3 hours.
- Single Claim window provides access to all data required to generate a claim
- Patient Claim status window provides instant access to status of patient claims
- Auto-posting sends claims to alternate payer and/or set to patient responsibility
- Automated line posting eliminate data entry required for manual posting of line items
- Procedure Payment analysis at the point of posting, enables the users to address “underwater” claims immediately
- Manage procedure referrals and authorizations
- Eligibility tracking and prioritization
- Payer / Patient Credit management and reconciliation
- Dynamic patient statement management

Advantages:

- Elimination of manual calculation of chemotherapy appointments
- Elimination of paper fee tickets means no lost billings
- System manages referral and authorizations remaining
- Multiple statement schedules allows balancing of incoming payments
- Claim Statuses displayed by Last User, Status and Balances allows user to prioritize focus based on dollar amount
- User can produce a detailed “underwater” claim list by payer in order to facilitate reimbursement by individual payers.
